The Standard Barometer and Thermometer are used at 3 a.m., 10 a.m., 3 p.m., and 8 p.m., and the daily means are obtained by the application of hourly corrections, deduced from twenty years' observations. The centre of the barometer is twenty-two feet above the level of the sea, and the receiver of the rain-gauge is two feet from the ground. The wind, sea and general weather registered are for the current civil day—from midnight to midnight.

The total quantity of rain collected since 1st January is 0.26 inch, the average day for the same period being 1.74 inches.
